3M Health Care - Medical Solutions Division

BOOTH: 437

3M Center
Building 275-4E-01
St Paul Minnesota 1/27/2020 55144

www.3m.com/medical

3M, along with newly-acquired KCI, focuses on providing better care through patient-centered science. Helping transform patient outcomes by reducing the risk of preventable complications at every touchpoint. From solutions for BSI and SSI risk reduction to vital sign monitoring and temperature management, our team is ready to partner with you to strive toward a world with zero complications.

Action Medical Technologies LLC

BOOTH: 716

1495 Alanwood Road Suite 201
Conshohocken, Pennsylvania 19428

www.actionmedicaltech.com

Action Medical Technologies LLC (AMT) is a medication injector company delivering single fixed dose injectable medication via ultra-reliable, ultra-safe device - typically used for emergency pre-hospital patients via U.S. Department of Defense or Emergency First Responders to aid warfighters or injured or wounded people with a wide range of medications - from anesthetics, anti-biotics, anti-hemorrhagic, anti-opioids and others. The one device allows for injections by intramuscular, intravenous, intraosseous, and even nasal delivery. Most of our business is built around helping humans, but we do have veterinary projects to help DoD K9s (wounded or anti-chemical warfare) as well as other projects for pets and agricultural & large exotic animals.

Arcos Inc

BOOTH: 429

4714 Riverstone Blvd Ste 200
Missouri City, Texas 77459

<https://arcosmedical.com/>

ARCOS features the proprietary Burn Navigator software and app for managing targeted fluid resuscitation in adult and pediatric burn casualties; adopted by JTS CPG for Acute Resuscitation in 2016. Come "test drive" the Burn Navigator phone app at the ARCOS booth and see how guided burn resuscitation can improve outcomes and minimize fluid complications, or demo Burn Navigator online at BurnNav.net. Burn Navigator was developed in conjunction with the US Army Institute of Surgical Research and now is used at most major U.S. burn centers.

Argentum Medical

BOOTH: 332

2571 Kaneville Ct
Geneva, Illinois 60134

www.silverlon.com

Silverlon's family of advanced 7 day use silver plated antimicrobial dressing have long been considered the "Gold Standard" to the military over the last two wars to treat blast injuries, massive complex wounds and burn injuries. Silverlon dressings are effective against a broad spectrum of wound pathogens, easy to use (particularly by inexperienced personnel), easy to store and easy for patient transport. Silverlon can be used for multiple indications and is considered a true force multiplier and an ideal product for both military and civilian (disaster response) applications."

Aseptico

8333 216th Street SE
Woodinville, Washington 98072

CEO and industry innovator Kevin Goodwin and COO Niko Pagoulatos, PhD, a prolific engineering leader, direct EchoNous together based on their decades of experience.

BOOTH: 630

electroCore, Inc.
150 Allen Road Suite 201
Basking Ridge, New Jersey 07920

<https://www.gammacore.com/for-veterans/>

electroCore, Inc. is a bioelectronic medicine company whose first commercialized product, gammaCore™ (non-invasive vagus nerve stimulator) is available by prescription and is FSS contracted (#36F79719D0063). A portable, non-drug technology, this FDA-cleared device is self-administered without the potential side effects associated with commonly prescribed medications. When placed on a patient's neck over the vagus nerve, gammaCore stimulates the nerve's afferent fibers, which may lead to a reduction of pain in patients. Current indications are for the preventative treatment of cluster headache and acute treatment of migraine and episodic cluster headache.

www.masimo.com

Masimo is a global medical technology company that develops and produces a wide array of industry-leading monitoring technologies, including innovative measurements, sensors, patient monitors, and connectivity solutions. Our mission is to improve patient outcomes and reduce the cost of care. In 1995, Masimo debuted SET® Measure-through Motion and Low Perfusion™ pulse oximetry, which is estimated to be used on more than 100 million patients annually, touching 3 patients every second, and is the primary pulse oximetry at 9 of the top 10 U.S. hospitals listed in the 2018-19 U.S. News and World Report Best Hospitals Honor Roll. In 2005, Masimo introduced rainbow® Pulse CO-Oximetry technology, allowing noninvasive and continuous monitoring of blood constituents that previously could only be measured invasively, such as total hemoglobin (SpHb®). We continue to advance noninvasive monitoring, connectivity, and automation with innovations like the Root® patient monitoring and connectivity hub and the Patient SafetyNet™ supplemental remote monitoring solution, while expanding into additional measurement areas with SedLine® and O3® brain monitoring and NomoLine® capnography.

Remote Health Solutions

2669 Liberty Hill Road
Powhatan, Virginia 23139

www.rhsusa.com

Remote Health Solutions (RHS) is fielding the next generation of battlefield and remote medical care for the US military. Introducing the "Virtual Exam Room" (VER), the world's first completely-integrated telehealth solution across the entire continuum of care... from point of injury to MedEvac to higher echelon to hospital to home. VER answers existing and emerging requirements for triage, multi-patient monitoring, prolonged field care, remote primary care, telesurgery, telestroke, remote patient monitoring, teleconsultation, and secure data transfer. TRL-9. Field-ready. Capable across many comms environments, including cellular, satellite, and tactical radio networks. And by coupling this technology with the world's first commercial offering of the Air Force Research Laboratory's much-anticipated and highly-acclaimed BATDOK(tm) software application (currently for sale by RHS as the VER-Enabled BATDOK(tm) kit), it's easy to see why RHS is proving to be the industry leader for all things Virtual Health.

Sole Supports, Inc
7674 Highway 7
Lyles, Tennessee 37098

www.solesupports.com

BOOTH: 636

Sole Supports™ is an industry innovator: the only lab creating MASS ('Maximum Arch Supination Stabilization') Posture Orthotics. We are dedicated to providing a 100% custom calibrated foot orthotic.

Our core value is "We Make People Better". We realize healthy, functional feet are literally the foundation for a healthy body and an active life.

MASS Posture Orthotics are unparalleled support for the demanding physical activities of the military and preventing new injuries. MASS Posture Theory is immediately pertinent to all who are involved or interested in biomechanical management of the foot and lower kinetic chain

MASS Posture Orthotics are the shape of a patient's foot via a custom molded leaf spring. This allows the application of an even corrective force at the beginning of the Range of Motion preventing postural collapse. It necessitates the passage of weight through the foot in as close to an ideal gait cycle as possible while simultaneously evenly compressing the soft tissues.

The truly custom nature of these orthotics can be further augmented by an array of modifications, when appropriate.

US Army Medical Materiel Development Activity

1430 Veterans Drive
Fort Detrick, Maryland 21702

<https://www.usamma.army.mil/>

BOOTH: 931

The U.S. Army Medical Materiel Development Activity is the Department of Defense's (DOD) medical product development activity for products designed to protect and preserve the lives of Warfighters. The USAMMDA develops new drugs, vaccines, devices, and medical support equipment that enhance readiness, ensures the provision of the highest quality medical care to the DOD, and maximizes survival of medical casualties on the battlefield. USAMMDA project managers guide the development of medical products for the U.S. Army Medical Department, other U.S. Services, the Joint Staff, the Defense Health Agency, and U.S. Special Forces community. The process takes promising technology from DOD, industry, and academia to U.S. Forces, from the testing required for U.S. Food and Drug Administration (FDA) approval or licensing, to fielding and sustainment of the finished product.
